

## Introduction

This 3-day Air Traffic Familiarisation training has been designed to provide awareness of the complex connection between air traffic services, airport operations and airline operations.

Participants will gain fundamental knowledge of the COM-NAV-SUR and ATM environment. The training material will be provided in an electronic format (pdf). All lessons are taught in English and delivered in a classroom by a leading industry expert. We take pride in bringing the very best to our participants.

## Participant

The training has been tailored for airport operations personnel and airline operations personnel who are new in the aviation industry.

## Instructor

All our highly qualified and professional instructors offer more than 15 years of operational experience in the aviation industry.
