

ATSEP BASIC TRAINING

Air Traffic Safety Electronic Personnel

Introduction

This 9-day ATSEP basic training is ICAO doc 10057 and EASA 2017/373 compliant and designed to achieve the best training outcome. Considering participants availability and the possible inconvenience of travelling for training, this training is tailored to be delivered at the client's premises.

Participants will gain fundamental knowledge of the COM-NAV-SUR and ATM environment. The training material will be provided in an electronic format (pdf). All lessons are taught in English and delivered in a classroom by a leading industry expert. We take pride in bringing the very best to our participants.

A paper exam will be held at the end of the course and containing 100 multiple choice questions. The required training competence is achieved with a result of 75% and above, and accordingly a Certificate ATSEP Basic Training will be issued.

Participant

The ATSEP basic training is designed for ATSEP, technicians and engineers from ANSPs who work on operational, safety related systems and equipment, Civil Aviation Authorities or National Supervisory Agencies, airport managers or airport project managers.

Instructor

All our highly qualified and professional instructors offer more than 15 years of operational experience in the aviation industry. All training subjects will be delivered by only one instructor.

Course compliance

ICAO Doc 10057
Eurocontrol-SPEC-132
EASA Regulation (EU) 2017/373 Annex XIII — Part-PERS

Duration

9 days; 08.00h-16.20h
